

Coding Challenge

Build a contacts app, as described in the pdf provided.

The mockup provided is meant to serve as a rough guide. Feel free to modify as you see fit.

- A login view (can be fake)
- A list of contacts with a search bar (JSON file with data provided here: <http://beta.json-generator.com/api/json/get/4yLVmeGYe>)
- A detailed view of the selected contact
- A menu button that triggers a drawer with a link to log out (link redirects to login view)

We recommend that you spend not more than 4 hours on the challenge.

Evaluation Criteria

- Code design
- Code organization
- Knowledge of Objective-C or Swift
- Sense of aesthetics

Submission

- A link to the github repository with build instructions
